

GN 227

Pressed steel spoked handwheels

- **Material**
Pressed steel, epoxy resin coating.
- **Colour**
RAL 9005 black (type SW), RAL 3000 red (type RT), uncoated (type RH).
- **Assembly**
Reinforced hub with square hole.

Features and applications

GN 227 pressed steel spoked handwheels consist of a single unwelded piece of pressed sheet metal manufactured by a special process to give a reinforced hub. They have been especially designed for valves and are very resistant to high temperature and fire.

The slightly tapered hole allows easy installation and firm seating on a spindle.

For smaller diameters see VCRT. (see page 160) technopolymer lobe knobs.
