

DIN 580 DIN 580-NI

Lifting male eye bolts

• Material

- Execution **ST**: forged steel annealed body, zinc-plated blue passivated, machined contact face.
- Execution **NI**: forged AISI 304 stainless steel annealed body, machined contact face, passivated.

Features and applications

When installing DIN 580 male lifting eye bolts it is of utmost importance to ensure that the face is in firm contact with the mating face. The values indicated in the here-under table are only applicable when the component attached to the ring is in steel, cast steel or cast iron. Side loads across the eye plane are not permitted for safety reasons.
