

GN 808.1

Gaiters for universal joints

• Material

- Execution **E**: black rubber CR (NEOPRENE) for single joints.
- Execution **D**: black smooth PVC elastomer for double joints.

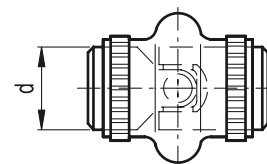

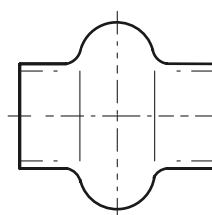

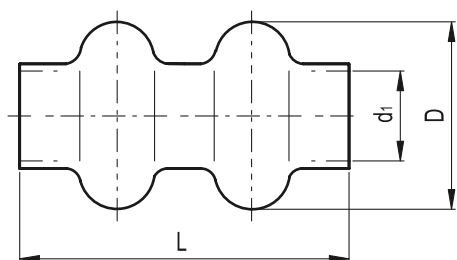

Features and applications

GN 808.1 gaiters give universal joints full protection against dirt. At the same time they can be filled with grease which gives long term lubrication for friction bearings. The gaiters are secured at each end with two cable ties.

GN 808.1-D

GN 808.1-E
