**Specification**

- Stainless Steel  
AISI 301
- *Stainless Steel characteristics* → Page 334
- **RoHS compliant**

**Information**

Retaining rings GN 111.6 are normally used together with ball chains or retaining cables.

One typical application involves making e.g. knurled screws captive, for instance.

GN 111.7 (see technical data new products) lists all standard parts that can be delivered with loss protection (with cut-in and retaining ring).

Star knobs GN 6336.13 with loss protection are delivered as a complete standard part made up of hand knobs with cut-in and mounted retaining ring, with retaining cable or ball chain.
