20	35	60	25	50	M 6	10	36

Specification

- Steel zinc plated, blue passivated
- RoHS-compliant

Information

GN 480 flange bolts are used with clamp mountings or for attachment to profile systems, as foot or connecting elements, e.g. for adjusting the width or height.

With their low flange height, they provide an alternative for the foot clamp mounting GN 473 in applications where clamping is required at low height above the clamping surface.

The bore distance m of the flanged bolts GN 480 is matched with the clamp mountings GN 473 and GN 477 as well as with retaining magnets GN 51.6.
