Specification

- Steel
 - Case-hardened steel C10 zinc plated, blue passivated
 - Bearing pins tempered
 - Bearing rivets case-hardened
- All moving parts lubricated with special grease
- Hand grip
 - High quality, oil resistant, red plastic
- Clamping screw GN 708.1, type A
 - Steel, zinc plated
 - Rubber tip 85 Shore A
- RoHS

Accessory

Information

GN 810.4 toggle clamps are latched in both end positions. In the clamped position, this prevents unintentional opening or opening caused by vibrations; and in the open position, it prevents self-closing of the toggle clamp, such as due to an extended clamping arm. The latching can be disabled with a single hand to allow for opening / closing.

They work according to the toggle principle: lever and clamping bar move in the same direction. In the clamped position the operating lever is in its vertical position.

Toggle clamps in the U-bar version with two flanged washers (type VL) can accommodate an application specific clamping screw. A clamping screw with neoprene rubber tip is also included for type VLC.
